Debian	Stable servers aur general-purpose computing	Web servers, cloud infrastructure
Fedora	Developers aur newer Linux technologies	Development workstation, technology testing
ine Linux	Lightweight containers	Docker images, microservices
ine Linux		
ali Linux	Cybersecurity aur penetration testing	Security labs, authorized vulnerability assessment
Documentation		
arrot OS	Security testing, digital forensics, privacy	Ethical hacking lab
rrot Linux		
nux Mint	Desktop users aur beginners	Personal computer, office desktop
ch Linux	Advanced users, customization	Custom Linux workstation
E / SUSE Linux nterprise	Enterprise systems aur administration	Business servers, enterprise infrastructure
zon Linux	AWS cloud workloads	EC2 instances, cloud applications
acle Linux	Enterprise workloads aur Oracle ecosystem	Database servers, business applications
berry Pi OS	Education, IoT, embedded projects	Raspberry Pi, hardware automation
Android	Mobile devices	Smartphones, tablets, Android TV
Red Hat		
hromeOS	Chromebook devices	Education, browser-based computing
